Technical description

STRETCH FABRIC

A classic double opposite interlace warp knitted fabric weighting 190 g/m²— produced using multifilament super dull polyester yarns and elastomer.

SUPER ROUBAIX

The remarkable perspiration, burst, elasticity, comfort features combined with the soft and swollen handfeel of the brushing the unquestionable resistance also to strong uses and the easy maintenance, make it a real and undisputed reference point in the stretch brushed fabrics. Fabric suggested both for competitive uses and active-wear, outdoor, leisure and fashion clothing.

WIND PROTECT

Maximum protection from wind and good water repellency. Suitable for cold climates. Naturally repellent does not mean completely waterproof.

WATER REPELLENT

A term applied to fabrics that have been treated with a finish which causes them to shed water, but are still air-permeable.

WATER PROTECT

A term applied to fabrics whose pores have been closed, and therefore, will not allow water or air to pass through them.

SEAMLESS

Seamless yarn is the first high-performance specifically designed for use with seamless technology. Softly joined like a second skin to offer seamless garments in the best performance in terms of comfort, fit, freedom of movement, ease of cleaning and a good dimensional stability.

ANTIBACTERIA

This fabric has been studied to obtain maximum hygienic protection, with antimicrobial and antibacterial action. The effective active-defense against a large spectrum of micro-organism such as bacteria, fungus and moulds, guarantees freshness and hygiene for the body, preventing bad odors and many allergic effects.

THERMO PROTECTION

Thermo protection fabric that allows the perfect regulation of the body's temperature.
